

Motivation letter

Rabinchuk Vitaly

September 7, 2018

The basic principle by which I was guided in my work is "Nothing for us without us." Therefore, for me, to represent the community of people who use drugs is first and foremost to implement this principle, which is also supported by EHRA.

My main motivation, as a member of the Steering Committee, is the willingness to act responsibly and actively, realizing this responsibility for the sake of my community and all the members of EHRA.

It is pleasant to note that EHRA shares and supports the fact that the impact on processes that somehow affect people who use drugs is not possible without the active participation of representatives of our group. That this fact, in itself, allows implementing important principles - transparency, meaningful participation, constructive dialogue. These principles are important, because only in these circumstances my community can help to increase the effectiveness of positive changes in the region in order to exert an effective influence on the decisions and programs implemented.

I understand and take an active part in the activities of the community of people who use drugs in the EECA region. I clearly understand the mission of the values and tasks of the community, which EHRA also shares and supports.

I also clearly understand my responsibility, with appropriate consultations with other members to communicate the position and defend the priorities that would work for the common goals of all EHRA members in the region.

I am familiarized with the guidelines of the Steering Committee and I am ready to execute them accordingly.
